

Tribal Campaign 2017, the Primary Election

Questions: These are some topics I want addressed.

Please focus on your core values with respect to what quality of life you want to leave for our next generations.

The Environment: What are your thoughts on the quality of our overall environment now and what you want it to be for our pre-school students by the time they're in high school?

The Economy: On the premise that replacing imported products and services best improves a local economy, What are your thoughts on how we as a community can help serve each other's needs? In this effort how best can tribal government contribute?

Education: If we are to raise out of a grant driven economy, how best can we influence our education systems?

Social Justice/ Community values: What are your thoughts of the quality of social justice in Hoopa? What is the base observation of your opinion?

Spiritual/Cultural values: What are your thoughts on how we consider our spiritual/cultural core values when planning the future so as to improve a quality of life for our youngest age children as they grow up?

Please discuss your impression of these two job titles: Law Enforcement Officer and Peace Officer?

We need a local grocery store, if the "tribe" manages it how do we keep it stocked? Customers can purchase what is available, what will be available? Who decides this?
