

Managers log Monday

March the 30th 2020.

Well, what's happening this week? Today you are invited Humboldt County residents are encouraged to take part in a virtual town hall meeting regarding the local response to COVID-19. This happens today 630 to eight o'clock pm. The community can watch this town hall meeting live at Access Humboldt's YouTube page. Access Humboldt Channel 11. But we don't receive that out here. Or you can listen to KZZH-low power, FM, that's KZZH dash LP 96.7.

The townhall will be available for viewing following the event. So they're going to be recording it now. It's going to be on Accessed Humboldt YouTube page. Community questions can be submitted before the event, email COVIDinfo@co.humboldt.ca.us, please include a subject line attention, Town Hall.

So all this information on what you do, what the meetings about and who's going to be there speaking and how you can make contact is on our Community Calendar for today's date. Go to March 30. And you can click on the press release information that's posted their news release and get all the instructions on how you can log in to this virtual town hall meeting. That includes everyone, everyone in Humboldt County. So that's what's happening today.

And we're starting out another week, coming up to work cannot way to Friday and next Friday Edition, we have an interview, I'm still working on editing it to fit into our time schedule. Going to be talking about the local broadband project proposal that's being submitted April the first, that's the due date, so that as of today so they still have a few moments if they haven't already send it in to tweak it just a little bit more. And I believe that they're looking for some more letters of support, either from the community from other tribal departments.

It's going to be available, it's going to make access to broadband to residents and businesses. Right now the Hoopa Valley Tribe has a fiber optics running to all the departments. The furthest one is the Hoopa Housing Authority. So we'll find out all the details on how that is operating and why that was set up that way. It was actually phase one, while phase two is going to have actually create a local internet provider that will be serving all residences and businesses within Hoopa Valley. So find out more. Next Friday, Friday edition, we'll tell you the rest of the story. Thanks for listening
