

Managers Log

Tuesday, April the 14th 2020

Working on our website, uploading some programs on Friday Editions we've done. Got the three part series with Melodie Moore talking about the effects of COVID-19, and how that has impacted her, her working life as a teacher at the high school, and sharing with us some information of our history. How have we dealt with similar things like this in the past? Have we been affected by pandemics or illnesses that had a real effect on us? How did we survive that? How did we get over that? And what does the future look like? Is this a new normal that we have to adjust to once again? Well, we asked her a series of questions, and we end up having over an hour's conversation that we're able to divide up in three parts. I'm getting those uploaded to the website. We have the first part that ran on the ran on April 10th. The next one's coming up on Friday the 17th and the third one on the 24th.

But it also is put together, all three, in one file. So that's also available on our website. Hopefully by the end of the day, we'll have all of them. And then tomorrow we're sharing the report from the Kimaw Medical Center's Behavioral Health Program. Boyd Farris and some of his staff came into Studio 91 and gave us an update on how they are adjusting their services in light of COVID-19. So that information will be up on our website and we're going to broadcast that in our nine o'clock and five o'clock hours on Wednesday, the 15th. So you can hear once then, and if you want to hear it again, well, it's going to be on our website www.kidefm.org, under the downloads and podcasts area, so look at look for that tab and you'll see all the other programs that we have lined up there.

Some of the other things we have featured on the Friday Editions, and we also have Managers Log programs, we're trying to get those updated as well. So we'll have that information. They're a little time consuming. We just got three people here trying to balance stuff around and move around, get you as much information as we can share in what time that we do have. Hopefully, it's helpful to you. Now it's our purpose to provide some service to you that will spread some more information, no need to spread more viruses, but, hey, you always need information that will help you. So that's what we're looking forward to doing. And I hope you're doing well, being safe, Doing shelter thing, keeping social distancing, and fun, I hope. We'll come to the end of this whole pandemic situation and things will go back to normal. Hopefully we're going to learn from this situation and maybe we're going to replan, take a look at what is essential and take a look at it all.

Yeah, things have slowed down to a slow pace that we're able to look at things in a different light. And as Melodie had mentioned, seeing this shelter in place is much like cocooning, the caterpillar cocoons, and emerges as a completely different being able to fly. Perhaps we'll use this cocooning period that we're in and emerge as something with completely new abilities and thoughts and actions and ways of thinking. So thanks for listening. Take care.
