

Manager's log Thursday, April the 30th 2020

The last day of a month, and we are having our first Hoopa Valley Tribal Council meeting as a conference call, well, it's going to be my first experience of doing this. I have an appointment to call at 1:30pm. I've got the phone number to call and the code number that I enter once I get connected, I may have to wait. I don't know but I will be on the line at 1:30 on my end anyway.

I'll make a presentation about the purchase of the Cromex STAC6 unit to allow the number of audience members to call in at one time to join a conversation. At least three people on the phone lines and however many people are in the studio. Or have two people on hold and one caller talks at a time. It just gives us a little more flexibility because right now we only have one phone line that connects to the studio. So now we can carry three and actually up to six, but we don't have six phone lines. So that's a different operation. Now we're talking about into the future. So that's what's on our plate for today.

Hoopa Valley Tribal Council meeting, as a conference call. And we are the first item in new business. And we're trying to do some Community Connections, trying to lean towards finding out what's going on in the community. How is this COVID-19 making people adjust to a new way of life? People at home people not able to go places. What suggestions do people have from this experience? or How could they make that better for themselves?

What information can people share on our calendar and our PSA section, if you have a meeting, maybe have virtual meetings. That's what a lot of companies are doing virtual meetings. Well you want to have that notice out, you want to invite the public or however. You could use, go to our website [www-dot-kidefm dot org](http://www-dot-kidefm_dot_org), go to the calendar, the PSA section or both of them. And there is an area where you can put that post, the ID information about your virtual meeting and the code numbers whatever you use Zoom or any other medium that allows conversations to happen like that.

However, they do this you need to share the phone number and the code number and if it's open to the community, you put it there and we'll make sure it gets posted. Just one way we're trying to help out in this situation of allowing people to meet and discuss important issues of the day. Civic community still marches on. Thanks for listening
