

## **Managers Log Tuesday May the 12th 2020**

Well, I remember not too long ago, there was this Zoom call regarding the Superintendent of Klamath Trinity Joint Unified School District, they're having interviews with the five candidates. And people were invited to attend that by Zoom. I feel that it didn't go well. It was on a Saturday, started early in the morning went into the afternoon. I did notice on Saturday that there was another email that went out, reminding people that, hey, this meeting is happening right now.

So maybe it wasn't well attended. But I haven't heard whether or not they hired a new superintendent. So gonna have to find that out. I do know that there is a opportunity to interview the president of the California School Board Association. And this person will be talking about Governor Newsom's May budget.

This is scheduled, it's going to come out on Thursday the 14th. So, she wants to have a discussion about how the cuts will impact classrooms once and when they are reopened. That's one of the things you could discuss with Xilonin Cruz Gonzales, the President. I don't know if I'm pronouncing your first name correctly. What's the talk about coordinating the reopening of schools at the state, county and local levels? What resources needed in order to reopen schools early if that is possible?

What necessary precautions and protections needed for students and staff including PPE to ensure their safety? I don't know what PPE stands for. California has the worst student to teacher ratio and student to staff ratios in the nation, even prior to the pandemic. So these are what this person wants to talk about if there is to be an interview, tried to get some people who know about school districts from the board level to take part in interviews, so far I haven't been successful in doing that.

But it is important to know one day that the schools will be reopened. How will that be? We put a lot of money into those schools in that facility, so are we gonna have to change things or what's the future look like in education, for our tribal members and People living in the communities?

More food for thought and like to get some input on that. Thanks for listening
